

Progress

■ **Launched on AEX exchange on Apr. 4th, 2018**

On Apr. 4th, 2018, LITEX launched on an crypto exchange called AEX and opened the LXT/BTC and LXT/CNC trading pairs. The transaction would be opened on Apr. 8th, 2018, at 11:30 am. LITEX would work together with AEX to improve the liquidity of LXT, and promote LITEX to more investors.

■ **Launched on Huobi Global exchange on Apr. 10th, 2018**

LITEX launched on Huobi Global exchange on Apr. 10th, 2018 at 2:00 pm. Huobi Global provides secure and reliable digital asset trading and asset management services to millions of users in over 130 countries worldwide. The collaboration with Huobi Global exchange helped LITEX pave the way to make a influence among investors globally.

■ **On Apr. 14th, 2018, the Overseas Digital Cryptocurrency Micropayments Status and Future Development Seminar held by LITEX was successfully completed**

On Apr. 14th, 2018, the Overseas Digital Cryptocurrency Micropayments Status and Future Development Seminar held by LITEX was successfully completed. The conference was held in Zhongguancun. Leo and many

blockchain experts discussed the status and future development of digital cryptocurrency micropayments. He said how digital cryptocurrency was used in the payment area would be main trend in the future, which involved not only digital cryptocurrency itself but also how technologies could be applied in business in an appropriate way. LITEX was a fully decentralized value exchange ecosystem and paid attention to the application scenarios of cryptocurrency payment. At the conference, Dr. Jeffrey Wernick and Professor Lin William Cong gave wonderful speech and declared to be LITEX's advisors, which will be beneficial to promote LITEX's internationalization and its future development.

■ **Launched on BTB exchange on Apr. 16th, 2018**

LITEX launched on BTB exchange on Apr. 16th, 2018 and opened the LXT/BTC and LXT/ETH trading pairs. BTB is a global digital asset trading platform registered in Belarus, providing currency trading, contracts, big data analysis, digital capital management and other services. The cooperation with BTB exchange would improve LXT liquidity and provide better service for investors.

■ **Established strategic cooperation with Wanchain on Jun.25th, 2018**

LITEX established strategic cooperation with Wanchain on Jun.25th,

2018. Wanchain aims to build a 'super financial market' by connecting distinct digital assets. Its key features are cross-chain interoperability, privacy, and smart contract functionality. Wanchain connects and facilitates the transfer of value between different blockchains in a distributed fashion. As a fully decentralized value exchange ecology based on layer2 technology, LITEX could provide Wanchain with layer2 network to help Wanchain realize off-chain transaction by accessing its mainnet as well as shared blockchain applicable ecology with it. Also, Wanchain could provide LITEX with more potential investors via its strong oversea community ecosystem.

■ **Launched on Fcoin exchange on Jul. 12th, 2018**

LITEX launched on Fcoin exchange on Jul.12th, 2018, at 8:00 pm. Fcoin is a digital asset trading platform and devoted to creating an autonomous, efficient and transparent digital asset platform that allows traders and investors to confidently trade on any size . The cooperation with Fcoin would help LITEX raise the exposure in blockchain industry and improve the liquidity of LXT .

■ **Participated in Wanchain's trip to Southeast Asia from Jul. 7th to Jul. 16th.,2018**

LITEX participated in Wanchain's trip to Southeast Asia from Jul. 7th to

Jul. 16th. The first conference was held in Djakarta of Indonesia, Laura, LITEX CMO made a speech about the progress of LITEX. On Wanchain's trip to Southeast Asia, LITEX introduced the bright future of layer 2 technology in the future. LITEX was devoted to exploring the global market and collaborating with more public chains to build value exchange ecology of trillions as well as promoting the development of protocol layer network.

■ **Launched on New York NASDAQ screen on Aug. 8th, 2018**

LITEX launched on New York NASDAQ screen on Aug. 8th and got much attention from oversea investors. LITEX would enter the oversea market gradually and provide better service for oversea investors.

■ **Participated in the 11th international algorithm game theory seminar on Sep. 14th, 2018**

As the only invited project, LITEX participated in the 11th international algorithm game theory seminar on Sep. 14th, 2018 and talked about the future of blockchain technology with two Turing Award winners. Qizhi, Yao pointed out that blockchain network would have multi layers like traditional Internet and layer2 technology was essential for the development of blockchain technology.

■ **Attended the Third Technical Seminar of Data Center Hotspot on Oct,19th (HotDC 2018)**

LITEX was invited to attend the Third Technical Seminar of Data Center Hotspot on Oct, 19th (HotDC 2018). The conference focused on how to solve high-performance development problem of data processing. LITEX would leverage the abundant platform resources of Hotnode to build the largest layer2 commercial-scale ecology.

■ **Released testnet at GAEX ‘Chain-go’ meetup -----Shanghai station on Oct.20th, 2018**

LITEX released testnet at GAEX ‘Chain-go’ meetup ----- Shanghai station on Oct.20th. LITEX CMO Laura introduced functions on testnet v0.2, which realized cross-chain atomic swap between Bitcoin and ERC20 tokens, distributed fast routing, off-chain scalability, ect. As a project with strong technical and industrial background, LITEX would work together with Chinese Academy of Sciences and Yeepay to build the trillion-level value exchange ecology of layer2 technology globally.

■ **Established strategic cooperation with Matrix on Oct.15th, 2018**

LITEX established strategic cooperation with Matrix on Oct. 15th,2018. MATRIX AI Network is an intelligent, open-source, new generation blockchain that aims to solve major challenges currently stifling the

development and adoption of blockchain technology. MATRIX leverages the latest artificial intelligence (AI) technology to deliver on the promise of blockchain. LITEX CMO Laura said LITEX was willing to combine its traditional payment industry background with the public chain technology of MATRIX to create the new ecosystem of blockchain. LITEX would use layer2 technology to help MATRIX optimize the ecological construction. MATRIX would also leverage its strong overseas community ecology to help LITEX develop its overseas communities and application scenarios.

■ **Released the testnet v0.2 on Oct.24th, 2018**

LITEX released testnet v0.2 on Oct.24th, 2018 and achieved main achievements. By upgrading the original Lightning Network stack, LITEX has enabled partial withdrawals, channel expansion and cross-chain (BTC and ERC20, to start) atomic swaps. Testnet could not only support ordinary users to operate but also allow developers to create nodes that could link LITEX nodes. Layer2 technology developed by LITEX would be significant to realize off-chain transaction, cross-chain communication, solve the performance limitation of main chain and connect isolated public chain islands.

■ **Launched on AEX community and Huobi Chat in mid-November**

LITEX launched on AEX community and Huobi Chat in mid-November.

AEX is a global digital assets integrated service platform that integrates information, community, application, market and digital currency trading. Huobi Chat is a social network platform in the blockchain era built on the advantages of social networks of Huobi Group and its global exchange business, which has launched a new business model as ‘socializing is mining’ . The cooperation with AEX community and Huobi Chat would help LITEX enhance communication with users and help them know program progress intuitively.

■ **Launched the first ever commercially applicable layer 2 product demo at Dapp Ecological Development Summit Forum on Dec.1st globally**

On Dec.1st, LITEX launched the first ever commercially applicable layer2 product demo globally at the Dapp Ecological Development Summit Forum. The product was the coin-flipping dapp game based on Rinkeby of Ethereum. Audience at the scene could experience the unprecedented smooth experience of Ethereum games: several selected audience participated in the coin-tossing game and everyone was allocated with 1eth (Rinkeby test coin) as the starting chip to compete for the championship within 100 seconds by the hand speed and strategy. After the fierce competition, 17.52eth (Rinkeby test coin) was generated by the champion in one minute. Which made great sensation at the scene

and were reported by dapp medias.

■ **Established strategic cooperation with Imperial Throne on Dec, 20th, 2018**

LITEX established strategic cooperation with Imperial Throne on Dec, 20th, 2018. Imperial Throne is one of the first multi-player strategic war game based on the public blockchain. The strategic cooperation would be essential for LITEX to promote the commercialization of layer2 technology in the field of dapp games.

■ **LITEX launched on Bihu platform on Dec.28th, 2018**

LITEX launched on Bihu platform on Dec.28th, 2018. Bihu Community is a platform for crypto investors to share and obtain token investment information. KEY is the utility token for both Bihu ID and Bihu Community. LITEX would leverage Bihu's strong social platform and good community atmosphere to serve for LITEX fans and improve their understanding about LITEX.
